TEAM DEVELOPMENT — BESPOKE BY DESIGN

SAME ROLE. SAME GAP ON PAPER. COMPLETELY DIFFERENT FIX.

Two team leaders underperforming in different ways. The instinct was to give them both the same plan. That would have helped neither of them.

A GENERIC PLAN WOULD HAVE FAILED BOTH

The KPI scorecard flagged two team leaders with performance gaps. On paper, both looked like a training problem. In practice, they were completely different situations — and diagnosing that difference was the whole job.

WHAT THE DATA SHOWED

- One leader: strong technically, but people process compliance was slipping and communication style was creating friction in the team
- Other leader: excellent communicator and natural leader, but lacking technical confidence in a specific, complex part of the operation
- Neither gap would have been fixed by the same module at the same time

The scorecard shows you **where** the gap is. Understanding the person shows you **why**. The intervention comes from combining both — not just reacting to the metric.

TWO LEADERS.
TWO COMPLETELY DIFFERENT INTERVENTIONS.

EXPERIENCED LEADER

BEHAVIOURAL GAP

DIRECTIVE COACHING

GROW + SBI feedback framework

- Coaching focused on reflection, not instruction — encouraging ownership of the change
- Feedback tied to observable impact on others, not intent or personality
- Mentored through proximity: issues addressed in the moment, in context
- Bi-weekly reviews gated on metric improvement before progressing

HIGH DIRECTION · HIGH CHALLENGE

NEW LEADER

TECHNICAL GAP

SUPPORTIVE MENTORING

Enablement strategy — no correction needed

- Shift plan reviewed together before each shift — then she ran it alone
- Coaching questions rather than instructions: "where do you see the pinch points?"
- Autonomy protected — no micromanaging of her communication style
- Safety net visible; used rarely

LOW DIRECTION · HIGH SUPPORT

WHAT CHANGED — PER LEADER

EXPERIENCED LEADER — DIRECTIVE COACHING

BEHAVIOURAL SHIFT

COMMUNICATION CLARITY

Improved — operatives now understood exactly what was required

PEOPLE PROCESS COMPLIANCE

Restored — leadership duties no longer deprioritised

REWORK HOURS

~15 hrs/week recovered as error rate stabilised below tolerance

Proximity coaching broke the self-awareness gap. Issues addressed in context couldn't be argued away.

NEW LEADER — SUPPORTIVE MENTORING

ACCELERATED COMPETENCE

COMPLEX SHIFT PLANNING

Running independently — what was a stress trigger is now routine

TEAM PEOPLE SCORES

Highest in the operation — empathetic communication style intact

TRAJECTORY

Moved from new starter to high-potential leader in one quarter

Mentoring built technical confidence without touching what was already working.

TAKE THIS WITH YOU

FAIRNESS DOESN'T MEAN TREATING EVERYONE THE SAME.

It means knowing what each person actually needs — and being precise enough to deliver it. The data shows you the gap. The conversation shows you the person.

What does your team development look like — bespoke or one-size?
